The American Hebrew

The cost of this newspaper is 50,000 dollars and it is because it reveals the correct form of life for Jewish people and other religious people and is about the simple meaning of processes of living life – meant to go with deconstruction

I. Isiah and Isikiel

And so of course the process is back to normal in Sirohi and all religious lives. We are thankful to Jewish Young Prophet Sirohi. We actually now have cinema to follow and even Gospel in Greek to be read. We also mean we already know all of this in Jewish scripture, so some of that from us.

Ethics and Ideas of Life
Religion

Chess as a game ----------All together game won. But it also means all together a Jewish crisis of the worst type

that Sirohi just wins in a few days. It was also a law that Zionists were following in India which is how they have to follow it for Israel as worse. Sirohi really divines first the process of reading and writing and then quits the law. He means this is then won.

Jewish scripture here also reads – “Merina, we have won, because the law was removed, that caused the suffering.”

We call Sirohi really elliptical – he would say “Merina, we are just in love, and poetry and dancing and drinking”

This elipses argues that in line with the above religious scripture which is real and direct – that this elipses means it is is utopian, whatever happens, and the suffering meant to Americans that we do not joke about Mcshull and Lincoln – they actually joke throughout the process as “what the fuck is my house doing to me.” All of this then in Sirohi is not followed, he means make it to normal life.

II. How to Live a Jewish Life – The American Hebrew A Heritage Piece

Only about studies, even about philosophy and literature, also about a lot of Jewish experiences. New York Jewish people live in a lot of suffering we are telling the young prophet Sirohi. They suffer even on the slightest abuse by a man in a car parking. Sirohi does not believe this. He means be arrogant.

III. A Historical Analysis – by Shomit Sirohi

A film should be about religious Gospel – like the ones I made. It unfolds say, Greek churches and Greek housing and such Biblical images of women and men walking aroung. It can then become a film – I mean intellectual life is about films and film reviews, Jewish people also mean, life is about film and philosophy perhaps. It is meant to be a casual life, following this imagery. Greek films, dazzling performances, and just that. Now lighter stuff is Hollywood. Like that our taste in cinema is a taste in life. Earlier in history cinema was profound, but also film noir to watch, which then means also say Jason

Shwatzberg’s Dog Day Afternoon in 1980s which is brilliant as well. But it is not too watchable, after a watch it basically does not intellectualise much. It is also only one or two good films. Now imagine Sirohi’s already 10 films, and also film images at home screening. This is then a happy Jewish life, intellectual life spent with cinema artistic projections. It means it is a taste in Sirohi’s cinema, a light happy and sublime taste. Which is also profound and intellectual.

Now in fact it means – when suffering it is a dialectical image – I meant of this short mix of arguments and film history. When films are so fine, and so beautiful, we want to watch it and film review it. This is called Chasada – a process of simple reflections of life and cinema. Isiah means it was Chasada with Sirohi – that the dialectical image was so less, it was only four five days.

It means Chasada, is when a woman appeals to a man – is life Chasada – the mix of sweet comments and cinema, with distress and difficult violent lives.

IV. Scholem – on Chasada with Sirohi – not others

Chasada is chess playing, checking in jazz movements, and checking such names in line with Jewish Scripture on what is going on. It is like philology our Jewish heritage – it reflects on life and cinema – it means we found it cinematic the suffering because Sirohi is an actor. He means he is acting out some suffering – it is not really the Chasada like the Hindi word “Chaska” or “Masala” – Sirohi is a Masala theorist – he is doing it as Masala.
